**Subject:** Chabot College Fire Technology 1 - Fall 2025 Information - Email #7  
**Date:** July 25, 2025 at 01:23  
**To:** sprziborowski@aol.com

Good Day Fall 2025 FT 1 Students,

We are less than 4 weeks away from the start of the fall semester and I hope this finds you doing well. I will be sending out additional emails, but for now don't stress about anything regarding the Fire Technology class, especially about what to do before or what to bring the first night of class – **Monday August 18, 2025, at 7 pm.**

I will cover more as we get closer.

For now, please just take some time to digest and learn from the previous **SIX** emails I sent out, this email, and the next emails I will send out before class starts.

**NOTE:**

If you just registered **OR** have registered but have NOT received those previous SIX emails (July 20, July 17, July 14, July 2, June 19 **and** June 17), please go to our website [www.chabotfire.com](http://www.chabotfire.com) and go to the page "**Fire Technology 1 – Fall 2025 Information**" as they are archived there.

- *You should have received each twice. Why twice? Once to your personal email AND once to your Chabot College (Zonemail) email account.*
- *If you haven't checked your Zonemail account lately (or at all), please do so as you may be missing important information.*
- *If you haven't received them in your personal email, check your junk/spam – something you should be doing regularly as you may be missing key emails that could be buried within the garbage found there.*

There are 2 items I want to focus on in this email:

**ITEM #1:**

**The latest issue of Firehouse, one of only two major fire service trade publications left (Fire Engineering being the other and the biggest):**

FH Subscriber Digital Edition | [View online](#)

**DIGITAL HIGHLIGHTS**

**[Alley Garage Fire Considerations](#)**

*Jonathan Hall* puts engine company teams in the right frame of mind for response to a garage fire in an alley, including with respect to water supply in a circumstance where a pumper can't position adjacent to the structure.

**[Fireground Size-Up for Fires in Churches](#)**

Your July 2025 issue of *Firehouse* magazine is now available online. [View >>](#)

*Mike Terpak* explains why the design/construction of churches, including heavy timber ones, presents numerous challenges for fire chiefs and company officers who respond to fires at the buildings.

### [The Latest Communications Equipment for the Fireground and Beyond](#)

Officers, driver/operators, firefighters and special operations technicians are aided in multiple ways by the sophistication and affordability of systems that let them talk to each other without interference.

### [Calling For Help: A Good Policy](#)

*John J. Salka Jr.* tells fire chiefs who haven't established mutual-aid or automatic-aid agreements with neighboring departments that they expose their members and their community to unnecessary risk.

### [The Outside Fire Chief's Guide to Success](#)

*Robert Moran* taps his recent experience to explain why the survival of an externally hired fire chief depends on implementation of six steps before and after taking the helm.

### [The Use of AI in Public Safety Facility Design](#)

*Keith Driscoll* and *Lynn Reda* explain how architects who use AI as a part of the design process of a facility help their fire department clients to better validate decisions through a deepened understanding of the project.

## ITEM #2:

The latest issue of *Crackyl*. Now as mentioned above, I referenced *Fire Engineering &*

The latest issue of Crackyl. Now as mentioned above, I referenced Fire Engineering & Firehouse Magazines as really the only two major fire service trade publications in existence today. However, there are other ones that are relatively new (like Crackyl below) & trying to get an audience, as well as other lesser-known ones that I'll share when I have access to them for you to learn from:

[View this email in your browser](#)

We're proud to share this with you first.

The upcoming issue of **CRACKYL Magazine** features a powerful and personal cover story on our CEO, **Victor Stagnaro**—and **you have the chance to get early access** before it's released to the public.

Victor's story is more than a professional journey. It's a reflection of the mission we all stand behind: **supporting the families of the fallen and preventing future line-of-duty deaths.**

**NFFF is excited to offer you early access to the full issue—before it's released to the public.**

Want it delivered straight to your inbox?

[Click Here to Download the Full Issue](#)

NFFF is proud to be able to share this milestone with our community—thank you for being a part of it.

Please don't hesitate to reach out if you have any questions or concerns.

Thank you,  
Steve
